Professional Summary

Software Engineer with 5+ years of experience building scalable web applications using **Laravel, Vue.js**, and **RESTful APIs**, with growing expertise in **AI-integrated platforms** and agentic coding workflows using tools like **Copilot, Cursor**, and **Kiro**. Experienced in enterprise systems, **microservice architectures**, and cloud deployments on **AWS** and **DigitalOcean**.
Actively involved in the full project lifecycle from requirements analysis, **database schema design**, and **Figma** wireframe review to cross-functional team collaboration and module planning. Committed to clean code, system optimization, and delivering high-quality results.

Technology Stack

- **Backend:** PHP · Laravel · SOLID Principles · Unit Testing
- **Frontend:** Vue.js · Next.js · Tailwind CSS · Playwright
- **API & AI:** RESTful APIs · OpenAI / LLM API Integration · Vector DBs & RAG · Agentic Tooling (Cursor, Copilot, Kiro) · Swagger
- **Database:** MySQL (Schema Design) · PostgreSQL · Redis · Query Optimization
- **CI/CD & DevOps:** Docker · GitHub Actions · CI/CD Pipelines
- **Cloud Services:** AWS (S3, EC2 basics) · cPanel · VPS
- **Project Management Tools:** Agile · Scrum · Jira · Trello · Postman

Key Projects

- **WEFI - Financial Solution & AI Verification:** Developed a foreign financing platform for lending, payments, payouts, and document verification. Integrated AI document analysis & OCR pipelines for automated verification, supported by PostgreSQL, Redis caching, background job processing, and containerized workflows. **Key Contribution:** Secure API architecture, AI Document Verification, Payment gateway, Background processing, CI/CD pipelines, Cloud deployment readiness
- **QA Brains - QA Engineering & AI Platform:** Re-architected a global knowledge-sharing platform for scalability. Integrated AI-assisted test case generation and LLM query assist, cutting page load time by 40% and streamlining user experience. **Key Contribution:** LLM / AI Integration, Query Optimization, RESTful APIs, DB Schema Enhancement.
- **Hibox HRM - SaaS:** Developed SaaS HRM with centralized authentication. Improving billing efficiency by 30% and reducing failed transactions. **Key Contribution:** Multi-Tenancy Architecture, Authentication & Authorization, Stripe Subscription Management, RESTful APIs, AWS Cloud Services, Database Design

- **Hibox CRM - SaaS:** Enhanced user experience and seamless subscription billing integration. Integrated AWS S3 storage for document management, reducing latency by 25%. **Key Contribution:** Subscription Billing System, AWS S3 Integration, Security Enhancement, RESTful API Development, Performance Optimization
- **Sources - Wholesale Marketplace:** Implemented scalable applications, optimized the user experience, and integrated affiliation. **Key Contribution:** Database design, API & UI Development, Performance Optimization

Professional Experience

Software Engineer

Riseup Labs | May 2025 – Present

- Requirement Analysis: Functional & Non-Functional Requirements, Use Cases, Scalability Planning, Performance & Bottleneck Analysis
- AI & LLM Integration: OpenAI & LLM API Integration, RAG Pipelines, Vector Search, Response Caching, Prompt Engineering
- API & System Design: RESTful APIs, Caching, API Security, Request Queueing, Idempotency Handling
- Agentic Workflows & Cloud: Agentic Tooling (Cursor, Copilot, Kiro), Deployment Automation, Release Management, Production Monitoring

Full Stack Developer

Gain Solutions Limited | Jan 2022 – April 2025

- Requirement Analysis: Requirement Analysis, Architectural Estimations
- SaaS & AI Integration: End-to-End SaaS Development, 3rd-Party AI Services & Stripe Billing Integration
- Database Management: Designed databases, Query optimization, Indexing, Backups
- Infrastructure & Management: VPS & cPanel Management, Marketplace Versioning
- UI/UX & Leadership: Wireframing, Front-End Development, Client Communication, Team Leadership

Software Engineer

Webtech | Jan 2020 – Dec 2021

- Requirement Analysis: Functional & Non-Functional Requirements, Use Cases
- Database Design: Schema Design, Normalization
- API Development: RESTful APIs
- cPanel Management: Server Configuration, Security, Performance Optimization

Education

B. Sc. in CSE

International University of Business Agriculture and Technology | 2015 – 2019
